11.7	<input type="checkbox"/> Check this box if a Continuation Form (Form AP-16) has been used to provide additional information for any of the above questions.	

FORM AP-11: Location of IAEA Safeguards-Terminated Waste Material

Reporting requirements are set forth in 10 CFR Parts 75 and 110 of the U.S. Nuclear Regulatory Commission (NRC) Regulations.

INSTRUCTIONS:

Submit Form AP-11 to report holdings of or changes in location of material on which IAEA Safeguards have terminated. If reporting holdings of this type of material, complete Questions 11.1 through 11.3. If reporting a change of location in this type of material, complete Questions 11.1 through 11.5. A separate Form AP-11 should be submitted for each type of material that is held or moved.

Question 11.1 Reporting Code: A unique reporting code will be assigned and reported to each location by BIS once an Initial Report has been submitted. The Reporting Code must appear on all future forms pertaining to the location after it is assigned.

Question 11.2 Activity Reporting Status: Indicate the current reporting status by checking the appropriate box (i.e., “New Activity” to report an activity for the first time, “Activity with changes” or “Activity with no changes” if a report for this activity was previously submitted, or “Ceased activity” for an activity that ended during the reporting year and will not be reported in future years). If the information previously reported for this specific activity has not changed, you are not required to complete the rest of this form, instead check the “Activity with no changes” box and submit along with Forms AP-1, AP-2 and any other required activity forms.

Question 11.3 Place Where Activity Occurs: Identify building name(s)/number(s) and any additional information that may more precisely define where the reported activity occurs (e.g. room numbers). If many rooms are used, you may describe areas within the building (e.g. 1st floor of the north wing).

Question 11.4 Description of IAEA Safeguards-Terminated Waste Material: Describe what type of waste the material, currently at your location, was prior to conversion to its IAEA Safeguards-Terminated form. Provide the form that this conditioned material is in now (e.g., vitrified waste, cemented waste, etc.), and the quantity and units (e.g., canisters, drums, etc.) of material present at your location. Round to the nearest ten if the amount is more than 10 but less than 1000 (e.g., 27 to 30, 148 to 150). Round to the nearest 2 significant figures if 1000 or more (e.g., 1525 to 1500, 15782 to 16000, etc.). Also provide the amount of plutonium, highly enriched uranium, and/or U-233 present in this material in grams.

Question 11.5 and 11.6 Prior Location of IAEA Safeguards-Terminated Waste Material: If the IAEA Safeguards-Terminated Waste Material was previously located in another building at your location, provide the appropriate building information in block 11.5 and leave the address in block 11.6 blank. If the material was previously located at a different address, provide the address for the prior location of this material in the space provided in block 11.6.

Question 11.7 Continuation Form: Check this box if a Continuation Form, Form AP-16, has been used to provide additional information for any of the above questions.
